

THE DRINK NUTRITION GUIDE

All beverages made with powder contain milk products or sodium caseinate, a milk solid derivative. 2000 calories a day is used for general nutrition advice, but calorie needs vary.

There may be variations in nutritional content across servings based on variations in overall size and quantities of ingredients, and based on special ordering. Changes in product recipes, and therefore nutritional information, may not be reflected in this brochure.

Our products are made in a facility that may also process common food allergens such as milk, soy, egg, wheat, peanuts and tree nuts.

For additional information, visit coffeebean.com or email info@coffeebean.com.
